

Hothfield Junior School Calculations Policy – November 2015

We build children's fluency and deep understanding of the four operations by following a clear and simple journey.

By using only the methods contained in this policy and by using models, images and apparatus to represent learning all along the journey, children develop their secure understanding of the four standard written methods by Year 6 – written addition, subtraction, short and long multiplication, and short and long division.

All staff working with children need to have their own secure understanding of the methods and representations used at Hothfield through each stage of their learning journey so children are not confused by alternative or inappropriate methods.

Hothfield Junior School Calculations Policy - 2015

Operation: Addition	Y1	Y2	Y3	Y4	Y5	Y6
National Curriculum Programme of study	<ul style="list-style-type: none"> ☑ read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs ☑ represent and use number bonds and related subtraction facts within 20 ☑ add and subtract one-digit and two-digit numbers to 20, including zero ☑ solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \quad - 9$. 	<ul style="list-style-type: none"> ☑ recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 ☑ add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> ☑ a two-digit number and ones ☑ a two-digit number and tens ☑ two two-digit numbers ☑ adding three one-digit numbers ☑ show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot ☑ recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems. 	<ul style="list-style-type: none"> ☑ add and subtract numbers mentally, including: <ul style="list-style-type: none"> ☑ a three-digit number and ones ☑ a three-digit number and tens ☑ a three-digit number and hundreds ☑ add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction ☑ estimate the answer to a calculation and use inverse operations to check answers ☑ solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. 	<ul style="list-style-type: none"> ☑ add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate ☑ estimate and use inverse operations to check answers to a calculation ☑ solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> ☑ add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) ☑ add and subtract numbers mentally with increasingly large numbers ☑ use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy ☑ solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> ☑ use their knowledge of the order of operations to carry out calculations involving the four operations ☑ solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why ☑ solve problems involving addition, subtraction, multiplication and division ☑ use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.
Method/s	<p>Adding using concrete objects</p> <p>Number line for counting on – within 10, then beyond 10</p> <p>Counting on from largest number</p> <p>Numbered and then unnumbered number line</p> <p>Missing numbers eg $10 = _ + 4$</p>	<p>Crossing 10s using concrete resources – bead strings, counters, base 10, numicon.</p> <p>Adding 10 – base 10, straw bundles, number line</p> <p>Add by partitioning – base 10, straws, - on number line/ blank number line</p> <p>Expanded column method – with base 10 initially:</p> $52 + 68 =$ $\begin{array}{r} 50 + 2 \\ 60 + 8 \\ \hline 110 + 10 = 120 \end{array}$	$352 + 468 =$ <p>Base 10 to represent:</p> $\begin{array}{r} 300 + 50 + 2 \\ 400 + 60 + 8 \\ \hline 700 + 110 + 10 = 120 \end{array}$ $\begin{array}{r} 326 \\ + 429 \\ \hline 755 \end{array}$ <p>Number line for counting on to support mental methods</p>	<p>To 4 digits:</p> $\begin{array}{r} 1326 \\ + 2429 \\ \hline 3755 \end{array}$ <p>For money and measure:</p> $\begin{array}{r} \pounds 32.64 \\ + \pounds 42.91 \\ \hline \pounds 75.55 \end{array}$	<p>Beyond 4 digits:</p> $\begin{array}{r} 21326 \\ + 22429 \\ \hline 43755 \end{array}$ <p>More than 2 numbers:</p> $\begin{array}{r} 1326 \\ + 2429 \\ \hline 204 \\ \hline 3959 \end{array}$ <p>Plus: Decimals to 2 and then 3 places – not just in context of money/measure</p>	<p>Extending to any number of digits; multiple decimal places.</p>

Hothfield Junior School Calculations Policy - 2015

Operation: Subtraction	Y1	Y2	Y3	Y4	Y5	Y6
National Curriculum Programme of study	<ul style="list-style-type: none"> ☐ read, write and interpret mathematical statements involving addition (+), subtraction (−) and equals (=) signs ☐ represent and use number bonds and related subtraction facts within 20 ☐ add and subtract one-digit and two-digit numbers to 20, including zero ☐ solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = -9$. 	<ul style="list-style-type: none"> ☐ recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 ☐ add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> ☐ a two-digit number and ones ☐ a two-digit number and tens ☐ two two-digit numbers ☐ adding three one-digit numbers ☐ show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot ☐ recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems. 	<ul style="list-style-type: none"> ☐ add and subtract numbers mentally, including: <ul style="list-style-type: none"> ☐ a three-digit number and ones ☐ a three-digit number and tens ☐ a three-digit number and hundreds ☐ add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction ☐ estimate the answer to a calculation and use inverse operations to check answers ☐ solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. 	<ul style="list-style-type: none"> ☐ add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate ☐ estimate and use inverse operations to check answers to a calculation ☐ solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> ☐ add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction) ☐ add and subtract numbers mentally with increasingly large numbers ☐ use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy ☐ solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. 	<ul style="list-style-type: none"> ☐ use their knowledge of the order of operations to carry out calculations involving the four operations ☐ solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why ☐ solve problems involving addition, subtraction, multiplication and division ☐ use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.
Method/s	<p>Using concrete objects within 20.</p> <p>Using number line progressing from within 10/ over 10/ within 20</p> <p>Number problems represented by numicon and base 10</p> <p>Recording using – and =</p> <p>Missing number challenges</p>	<p>To support mental subtraction/ finding the difference:</p> <p>Number line counting from smaller to larger number.</p> <p>Partitioning numbers with base 10.</p> <p>Column subtraction within 100 represented by base 10 – no carrying</p>	<p>874 – 523 becomes</p> $\begin{array}{r} 874 \\ - 523 \\ \hline 351 \end{array}$ <p>932 – 457 becomes</p> $\begin{array}{r} 874 \\ - 457 \\ \hline 417 \end{array}$ <p>Above represented by base 10</p> <p>Continue to support mental subtraction/ finding the difference:</p> <p>Number line counting from smaller to larger number/ counting back – depending on size of ‘gap’.</p> <p>Counting in 10s/ units on number line</p>	<p>Use formal column method for 4 digit numbers and to two decimal places in context of money or measure.</p> <p>Continue to support mental subtraction/ finding the difference:</p> <p>Number line counting from smaller to larger number – especially for finding the difference/ change/ money and time calculations when more efficient method than formal column</p>	<p>Extending to 5 digits and money and measurement to 2 decimal places</p>	<p>Extending to any number of digits or decimal places.</p>
