21st May 2019

Dear Reception Parents

We are very excited to share with you our plans for our new Reception Marvellous Maths Library. We are always looking to strengthen and extend our Mathematical Skills at Silsden Primary. As well as our work at school, we have been trialling some Education City maths games to do at home and we have been looking at a way to get the whole family involved and enjoy some 'Practical Maths.'

We have been busy preparing and organising an exciting set of Maths games for the children to choose and take home to play. This will be run on a weekly basis on a Thursday straight after school. The children are invited to come and select a Maths game with their families that they would like to take home and play. These Maths games can be kept at home and enjoyed until the following Thursday. The games will be 'signed out' on a similar system to a book library. Each game has a card, which will be added to a class folder under the child's name. When the game is returned to school, it's card will be placed back into the game.

We hope that you will invest your time into our new little library. We think that it will be of benefit to all our children, mathematically as well as socially, as the children will enjoy the experience with their families and enjoy the language and interaction from others.

If you have any questions at all. Please do not hesitate to ask the staff in Reception. Our first exchange session will start on Thursday 6th June.

Many thanks for your continued support.

The Reception Team.
