

Creative Home Learning Ideas

Moon Zoom!

Below are some ideas based around our new topic. Please read the ideas to your child and let them choose which activities they would like to complete at home with you or on their own. We would like to invite parents into class on **Tuesday 2nd April 3.30-4pm** to enable the children to showcase the wonderful work they have done both in school and at home with you.

- Visit your local library and search for space-themed books. Read and talk with an adult about the books you find.
- With an adult, search the web for fascinating space facts and make your very own Space Fact Book.
- Ask an adult to help you find the names of all the people who have walked on the Moon. There are 12 of them!
- Use an app to find constellations, planets, and stars in the night sky. Which constellation is the easiest to recognise? Which star is the brightest?
- With an adult, explore the Hubble Telescope website. Check out those amazing gallery images!
- Imagine you're an astronaut completing different space missions and make a mini book about your work.
- Make a telescope from junk cardboard materials and sticky tape. Just before bedtime, use your telescope to look up at the stars. Can you see the wonderful star patterns in the sky?
- Can you make up your own space song or rhyme?
- Can you design and make a rocket?

Have fun and just call in and ask any of the Year 1 team if you have any queries regarding the home learning activities.

In addition we will continue to send a Maths worksheet home each week to consolidate what your child has been learning in Maths lessons during the week.

Please read at home with your child as much as possible (at least 3 times per week) and sign your child's reading record. Please ask them questions about what they have read to help develop their comprehension and understanding.

Thank you for your continued support, it makes such a difference to your child to work together as a 3 way partnership – Parent, Child and Teacher.
