

# What will you choose to do?

Make a sketch of any interesting bottles you have at home. Remember to add patterns, textures, shading and finer details!

Calculate how many litres of water it takes to fill your bath. Which uses less water, the shower or the bath? How can you find out?

Make a list of all the solids, liquids and gases you can find at home. Are they kept safely?

Make ice lollies at home. Can you add a surprise ingredient that reveals itself as the ice melts?

Make homemade perfume or potions using things you find in the kitchen, garden or bathroom (before you start check with an adult which substances are safe to use). Use a pestle and mortar to grind up the things you find. Add liquid and strain to get rid of the lumpy bits. What have you made?

Visit your local library or bookshop to search for other plays and stories on the theme of potions. Write a book review and share it with others in your class.

Practice your cooking skills by inventing a new flavour of cookie or cake. Investigate which flavours work the best. How do you make different textures and consistencies?

Investigate a famous Scientist that developed a new vaccine to help save lives. Not Edward Jenner though as we are looking at him at school.

Design and make a fantastical potion bottle.

I'm sure that you will have lots of other ideas that will be even better
