

# Creative Home Learning Ideas

## Moon Zoom!

Below are some ideas based around our new topic. Please read the ideas to your child and let them choose which activities they would like to complete at home with you or on their own.

- With an adult, search the web for fascinating space facts and make your very own Space Fact Book.
- Ask an adult to help you find the names of all the people who have walked on the Moon. There are 12 of them!
- Use an app to find constellations, planets, and stars in the night sky. Which constellation is the easiest to recognise? Which star is the brightest?
- With an adult, explore the Hubble Telescope website. Check out those amazing gallery images!
- Imagine you're an astronaut completing different space missions and make a mini book about your work.
- Make a telescope from junk cardboard materials and sticky tape. Just before bedtime, use your telescope to look up at the stars. Can you see the wonderful star patterns in the sky?
- Can you make up your own space song or rhyme?
- Can you design and make a rocket?
