

Revolution

Our topic is 'Revolution', where you will be learning about the Victorian era.

This was a time of invention, creativity and exploration when great scientists, engineers, artists and adventurers helped shape our modern world.

For your home learning, we would like **you** to act like a Victorian. We want you to be great inventors, designers and artists; using the Victorians' achievements to inspire your own creations.

- Budding engineers – make models of Victorian bridges, palaces or railways.
- All you inventors can create your own invention that would have helped Victorian families.
- Designers can create a doll or toy like children in Victorian times might have had, or design an outfit for a rich (or poor) Victorian person to wear. Maybe design an outdoor game like those Victorian children would have played.
- Modellers can produce a Victorian mill, a house or even a town.
- Young artists can find out about Victorian artists and crafts people and use their work to inspire their own creations to bring into school.
- Cooks, you could research (and make) some Victorian foods.
- If crafts are your thing, you could try sewing a Victorian sampler.

Of course, you don't have to do any of these things – you can harness your inner Victorian and come up with your own amazing projects!

You can do more than one thing but we'd like everyone to complete at least one project.

We would like everyone to have their first idea for a project, ready to be explained to your class, on Friday 27th November.
