

Summer of Sport Home Learning Activities

- Create a 'how to play' video of an Olympic sport.
- Design a training programme to improve your ability at a particular sport.
- Create a model of a real (or made-up) sports stadium.
- Find out and create a fact-file of your parents' or grandparents' favourite athlete.
- Find out what food athletes eat to keep healthy and have a go at making it and eating it yourself.
- Watch a sports event (either in person or on tv) and write a report of what happened.
- Use Purple Mash or other music creating software to create music to accompany a particular sporting event or sporting moment.
- Write a poem about your favourite sport or athlete.

As ever, these are just some ideas to get you started.
We hope that you are inspired by this topic and look forward to seeing what amazing home-learning you create.
Mrs Holmes, Miss Johnson and Mr Bolland
